Craft is honed,
trust is earned,
and precision
defines excellence.

COBRA WATER PUMP PLIERS SETS

For over 35 years, KNIPEX Cobra® water pump pliers have offered superior gripping power and high leverage with just the touch of a button.

Simply position the upper jaw to the workpiece, push the button and move the lower jaw to desired position for fast, comfortable and convenient self-gripping and locking power.

The unique hex-shaped jaw offers three or more points of contact for a great grip. While the slim head design and narrow profile provide great access to hard-to-reach spaces and confined areas on the job.

PLIERS WRENCH SETS

The KNIPEX Pliers Wrench is a one-of-a-kind tool with unlimited applications.

From gripping and holding to pressing and bending, there is little the pliers wrench can't do.

With smooth jaws that won't mar the surface of workpieces to an easy push-button adjustment that maintains the tool's setting, the pliers wrench is a great tool to get the job done and replaces a full set of inch and metric open end wrenches and traditional adjustable wrenches.

The cam drive increases force to up to 10 times the applied hand power and ratcheting function allows bolted connections to be tightened and released quickly.

DIAGONAL CUTTERS SETS

KNIPEX high leverage diagonal cutters deliver superior cutting performance!

The forged-on axle joint and high leverage design creates a 20% reduction in hand force needed to cut compared to conventional cutting pliers of the same length.

Induction hardened, precision cutting edges cut several types of wire including piano wire, nails, screws and hardened steel.

PRECISION SNAP RING PLIERS SETS

KNIPEX Precision Snap Ring Pliers feature inserted and pressed-in tips made of high density spring steel that provide added resilience against excessive stress and strain.

They securely grip snap rings for easy installation or removal.

KNIPEX Precision Snap Ring Pliers are much stronger, perform more consistently and will last much longer (up to 10x longer) than any competitor's Snap Ring Pliers.

TWEEZERS SETS

KNIPEX tweezers and electronics pliers are expertly designed for delicate tasks and offer control, exceptional grip and cutting capacity when working on small components, circuit boards and watches.

From the different type of materials to the design of the tips and cutting blades KNIPEX sets the benchmark for reliability and performance.

ESD Tweezers = Discharges electrostatic energy through the handles in a gradual and controlled manner

SMD Tweezers = Allows work to be carried out on electronic components that can be soldered directly onto the circuit board using solderable connecting surfaces

Insulated Tweezers = Tested according to DIN IEC 60900 and rated up to 1000V. The tweezers are plastic dipped insulated and feature thumb guards to prevent slipping

INSULATED TOOL SETS

KNIPEX insulated tools offer the greatest possible safety, reliability and performance when handling electrical installations.

Each insulated tool is individually tested to a dielectric strength of 10,000V AC and provides a safety buffer of ten times the permitted maximum limit of 1000V AC.

KNIPEX insulated tools which bear the special $\triangle 1000V$ are approved for work up to 1000V AC.
