Classic Tool, Re-engineered.

High Leverage Diagonal Cutters

Maximum performance for the toughest applications

- **All-around performance:** cutting power, durability and ergonomics
- **Easier cutting:** approximately 20% less effort compared to the previous model due to high leverage joint position
- **Optimized:** redesigned handle for added comfort

Classic Tool, Re-engineered.

74 SERIES • High Leverage Diagonal Cutters

At KNIPEX, we take great pride in offering a diverse range of high-quality diagonal cutters and we're excited to transition these tools to a new design with a riveted joint that is closer to the cutting edges and requires 20% less cutting effort than our previous version.

You can easily identify the new version with a diagonal KNIPEX forging vs. the horizontal one.

This is a gradual transition and the 8" diagonal cutters will be first, followed by the 10" versions and finally the remainder of the product family.

We appreciate your enthusiasm and patience as we work to enhance your experience with our tools!

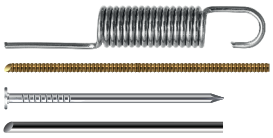

OLD VERSION | **NEW VERSION**

For very tough, continuous use

Precision cutting edges
induction-hardened (approx. 64 HRC)
cut several types of wire
including piano wire

Superior cutting performance, achieved by precisely aligning the cutting-edge angle with an optimized transmission ratio

RIVETED JOINT CLOSER TO CUTTING EDGES

Requires 20% less cutting effort

Available in KNIPEXTEND System
which consists of three component comfort handles and two slots for ColorCoded Clips or TetheredTool Clips
